

Wharton's Jelly

Umbilical cords contain Wharton's Jelly that is a rich source of mesenchymal tissue, which supports growth to many of the tissues in the body including bone, cartilage, elastin, collagen and muscle.

Umbilical Cord Suspension includes Cytokines, Growth Factors, Extracellular Matrix Components & Hyaluronic Acid.

It is an effective alternative regenerative therapy that can be used as an option to NSAID's and steroid injections to assist with pain and inflammation

The nanoparticles in the allograft create a therapeutic effect in these areas: Epicondylitis, Fasciitis, Meniscus Injury/Degeneration, Ligaments, Rotator cuff, Tendonitis, Intervertebral Disc Injury/Degeneration, Facet, Hip, Knee and Shoulder Joint and Osteoarthritis/ Spurs.

Also, scalp hair regeneration!

Our office uses Wharton's Jelly for Anti-Inflammatory and Therapeutic Benefits

Safety is key with our clinic. This treatment is harvested from vetted umbilical cord blood and tissue. High concentrations of cytokines are harvested. It is also a rich source of hematopoietic and mesenchymal tissue that have the ability to stimulate recovery. It helps repair tissues. We also offer an amazing scalp procedure to regrow lost or thinning hair.

BIO-IDENTICAL HORMONE REPLACEMENT THERAPY

Natural hormones have been proven to help people over 40 increase their energy, strength, bone density, even their sense of well being! We offer BHRT as a safe and effective supplement to Mother Nature's efforts and to remove fine facial lines.

For years we have treated with PROLOZONE AND OZONE THERAPY

We now offer therapy to energize your mitochondria which improves your oxygen utilization and diminishes symptoms of chronic disease. This is done by using PRP (Platelet Rich Plasma) and ozone. Prolozone Therapy, which is a combination of PRP and ozone, is extremely effective in diminishing pain in joints, ligaments, muscles, and soft tissues. It also initiates healing by flooding the area with growth factors harvested from your own platelets and plasma. Some patients add or substitute Wharton's Jelly.

For more information on our practice visit www.PacificWellnessVentura.com

"O SHOT"

We now have PRP therapies available in our wellness clinic that the patients love. Women who have incontinence and use several pads per day can be offered the "O Shot" which floods the urethra with growth factors to increase healing of the nerves, muscles, collagen, fat, and other tissues to decrease leaking and increase sensation.

"P SHOT"

Many men after the age of 40 and all men after the age of 70 start having ED problems, meaning problems with achievement or maintenance of erections. There can be many causes and we do have a multitude of treatments. The "P Shot" allows men to regenerate their normal tissues within the penis so there's an improvement with their erections and orgasms.
